PROFESSIONAL SUMMARY

Dynamic Software Engineer with 3+ years of experience in backend development, cloud solutions, and performance optimization. A fast learner with expertise across diverse technologies, delivering scalable systems and driving innovation through adaptability and leadership.

WORK EXPERIENCE

ProgCap
Software Engineer

Delhi, India
June 2024 - Present

- Optimized tenant-level pricing and inventory synchronization, achieving a 20% improvement in operational efficiency.
- Developed in-app notifications using API-based and scheduled triggers, reducing manual follow-ups by 30%.
- Enhanced reimbursement workflows by designing logic for allowances, reducing errors by 25% and approval times by 30%.
- Improved API performance by reducing query times by 25%, ensuring faster and more reliable operations.
- Automated report and dashboard generation, reducing manual effort by 90%.
- Implemented tenant-specific dynamic configurations, cutting setup times by 20%.
- Ensured zero-downtime deployments, enhancing backend commerce system stability.

RevFin
Software Engineer

Delhi, India
July 2022 - June 2024

- Automated server maintenance tasks, saving 6+ hours weekly and improving development cycle efficiency.
- Designed a comprehensive OCR solution for document processing, reducing validation errors by 60%.
- Leveraged AWS services (Lambda, S3, SQS) to enhance application performance and security.
- Accelerated loan disbursement processing from 10 minutes to under 10 seconds for 100+ cases with workflow optimization.
- Refactored legacy codebases, improving stability and reducing bugs by 60%.
- Implemented real-time tracking systems with MongoDB, enabling efficient data handling and reporting.
- Deployed secure servers using EC2 instances and SSL certificates.

ACHIEVEMENTS AND CERTIFICATIONS

Monthly Smasher Award
Recognized for exceptional project delivery and technical excellence.

RevFin
2023

Google Cloud Skill Badges
Earned 11 skill badges on Qwiklabs, showcasing cloud computing proficiency.

Google Cloud
2021

Hackerrank Ratings
5-star in C++ and Problem Solving, 4-star in JavaScript.

Hackerrank
2021

TECHNICAL SKILLS

Programming Languages:	Java, JavaScript, C++, Go, TypeScript
Frameworks:	Node.js, Nest.js, Spring Boot
Databases:	MongoDB, Postgres
DevOps & Cloud Tools:	AWS (Lambda, S3, SQS), Docker, Git
Tools:	Firebase, GitHub

EDUCATION

Lovely Professional UniversityBachelor of Technology in Computer Science and Engineering *GPA: 8.41*

Punjab

May 2019 - June 2023

JJ CollegeXII, BSEB *GPA: 83%*

Arrah

2017 - 2019

DK Carmel Public SchoolX, CBSE *GPA: 9.0*

Arrah

2016 - 2017

PROJECTS**Entertainment Zone** *Firebase, HTML5, CSS3, JavaScript*<https://palakbhushan.github.io/ums-proj/>

Designed a multimedia application with secure authentication and hosting using Firebase. Delivered a robust frontend interface, improving user engagement.

University Management System *HTML5, CSS3, JavaScript*

Developed a scalable system to streamline administrative workflows for universities. Enhanced efficiency in document management and reporting.
